

Dear grant applicants,

We have received several inquiries seeking clarification on which periods to provide financial statements to meet the "**three most recently available reviewed years**" criteria. We recognize applicants may have different financial reporting timelines based on fiscal or calendar year ends as well as the time required to prepare and produce audited or reviewed financial statements will vary by entity. Accordingly, we are asking applicants to provide the financial data for the most recent periods to which audited or reviewed financial information is available.

For example, the deadline to apply for our grant is 1/30/2023. Accordingly, we don't anticipate that calendar year end entities will be in a position to provide audited financial statements for 2022, in which case we will accept 2021, 2020, and 2019 financial statements to comply with this requirement. On the other hand, an applicant with a September 30 year end may have 2022 audited financial statements available, in which case, we would expect 2022, 2021, and 2020 financial statements to be provided.

Additionally, we ask for prior organizational budgets and current period organization budgets to be provided. Similarly, we are looking for available to date information. For example, a calendar year end entity, may be in a position to provide a completed 2022 budget to actual and a current 2023 budget with actual as of January 2023. Other entities may not have 2023 budgets available by January 30th and as such 2022 would be considered the current budget and 2021 the prior budget.

We hope this fully clarifies the period for which financial information is requested. If there are any additional questions, please don't hesitate to let us know.

Thank you for your interest in our grant and the time invested in our application process.
